

CLAIMS

What is claimed is:

1. A comfort strip for controlling under pant garments from becoming wedged within the declivity formed by the buttocks having:

5 a top portion, the top portion adapted to conform to a body region;

a bottom portion, the bottom portion adapted to couple to an under pant garment; and

a pair of opposing side portions, whereby the opposing side portions couple the bottom portion to the top portion.

10

2. The comfort strip of claim 1 whereby the cross section is generally trapezoidal.

15

3. The comfort strip of claim 1 whereby the cross section is generally triangular.

4. The comfort strip of claim 1 whereby the cross section is generally half-moon.

20

5. The comfort strip of claim 1 whereby the top portion is adapted to conform to a portion of the natal cleft.

6. The comfort strip of claim 1 whereby the top portion is adapted to conform to a portion of the perineum.

5 7. The comfort strip of claim 1 whereby the bottom portion is adapted to permanently attach to a portion of an under pant garment.

8. The comfort strip of claim 1 whereby the comfort strip is integrally formed within an under pant garment.

10

9. The comfort strip of claim 1 whereby the bottom portion is adapted to removably attach to a portion of an under pant garment.

10. A comfort strip for controlling under pant garments from becoming wedged within the declivity formed by the buttocks having:
a top portion, the top portion adapted to conform to a body region;
a bottom portion, the bottom portion adapted to couple to an under pant
5 garment;
a pair of opposing side portions; and
a pair of flaps, one extending respectively from opposite side portions whereby the pair of flaps are adapted to couple to an under pant garment.
- 10 11. The comfort strip of claim 10 whereby each flap has a top surface and a bottom surface, whereby the bottom surface is parallel to the bottom portion, and a fastening means attaches the bottom surface of a flap securing the comfort strip to an under pant garment.
- 15 12. The comfort strip of claim 11 whereby the fastening means is Velcro.
13. The comfort strip of claim 11 whereby the fastening means is an adhesive strip.

20

14. At least one horizontally placed comfort strip for controlling under pant garments from becoming wedged within the declivity formed by the buttocks having:

a top portion;

5 a bottom portion, the bottom portion adapted to couple to a rear portion of an under pant garment;

a pair of opposing side portions; whereby

the top portion, bottom portion, and opposing side is a semi-rigid material that has a memory and retains it shape.

10

15. The comfort strip of claim 14 whereby the top portion comprises silicon.

16. The comfort strip of claim 14 whereby the bottom portion couples to an under pant garment via sewing.

15

17. The comfort strip of claim 14 whereby a perforated fold is integrally formed.

20

18. The comfort strip of claim 17 wherein one perforated fold is centrally located on the bottom portion.

19. The comfort strip of claim 17 wherein more than one perforated fold is located on the bottom portion.

20. The comfort strip of claim 14 whereby the fastening means is an artistic array of adhesive variable in shape and size.
